

Call pitch

1. Welcome to Prabha EV / AMIK. How may I help you?
2. Ask if hindi or english is preferred?
3. If customer tells charging related issue, ask for charging station name (It will be mentioned on instruction board top and on canopy of charger).
4. If customer tells amount paid, but charging didn't start, ask them if charger display says (Idle/Connected/Charging/Parking)
5. Idle= available, Connected= preparing, Parking = Finishing.
6. Check Error message from logs. It will be also visible on charger screen (by tapping, red hazard light on top status bar of charger display).
7. Ask customer to check if emergency button is released (if pressed) (button position- 30kW-left side, 60kW-right next to display, 120kW-left side)
8. If charging didnt start due to GQ DIN error, unplug the gun, wait for few seconds, retry and pay again. Tell the customer paid amount will be BOUNCED BACK to their bank account, check "paytm refund" in bank statement of app like YonoSBI, Fedbook.
9. If charging didn't start due to BMS error, ask customer if car is turned off, ask them to move the car forwards and backwards, turn the car off again, retry charging.
10. For error like- AC or DC Contactor Fault, Module hardware fault, put message in OEM group or inform station owner to check if MCB trip or supply lost.

Gun Stuck Case-

1. Inform customer- "Charger or gun doesn't have any locking mechanism, car puts lock pin into a hole in the gun. Generally gun is released when EV users follow these methods"
2. Use gun unlock button (In newer tata cars).
3. Start the car and turn it back off.
4. Pull the release string in bonnet (tata punch, MG Windsor, Tata curvv)

MG Windsor charging issue-

1. If no above method works in MG Windsor,
2. Inform the customer, we have noticed this issue in MG Windsor, here is a solution. This has nothing to do with charger, purely vehicle side issue.
3. Keep the car turned on, keep the driver side door open, then attempt charging.
4. In emergency cases, disconnecting and re connecting negative terminal of auxillary battery will reset the car, TRY at OWN RISK.

Refund Cases-

1. If customer argues on refund, tell them the amount usually becomes visible in their bank account in maximum 15 minutes.
2. If customer wants proof, collect upi slip via whatsapp, share the refund slip.

After Every call send Satisfied or not message in Whatsapp.
