Hyderabad, Telangana

CAREER OBJECTIVE

Computer Science and Engineering (AIML) undergraduate seeking a Project Engineer role at Wipro, with hands-on experience in Python, Java, Artificial Intelligence, Machine Learning, Generative AI, Reinforcement Learning, and full-stack development. Aiming to contribute to enterprise-grade software solutions, data-driven applications, and digital transformation initiatives through strong problem-solving skills, clean coding practices, and continuous learning.

INTERNSHIP

Innomatics Research Labs, *Intern* Present

- Currently pursuing a 5-week internship focused on Agentic AI systems, LLM-driven workflows, and applied AI research.
- Working on autonomous agent design, prompt orchestration, and real-world AI use cases

EDUCATION

Marri Laxman Reddy Institute of Technology and Management, Hyderabad, Telangana, *B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning)* 2023 – 2027 | Hyderabad, Telangana
CGPA: 8.6 / 10

Nalanda Junior College, Hyderabad, Telangana, 2021 – 2023 | Hyderabad, Telangana
Intermediate (MPC - Mathematics, Physics, Chemistry)
82%

The Hyderabad Public School, Begumpet, Hyderabad, 2011 – 2021 | Hyderabad, Telangana
ICSE - Class X
92%

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, HTML

Artificial Intelligence & Machine Learning: Machine Learning fundamentals, Reinforcement Learning, Hidden Markov Models, Generative AI, Prompt Engineering

Frameworks & Libraries: Stable-Baselines3, OpenAI Gym (Gymnasium), NumPy, Pandas, Scikit-learn (basic)

Web & Databases: MongoDB, SQL (Basics), Full-Stack Development (Basics)

Tools & Platforms: Unity Engine (Game Development), Git/GitHub, IBM Watsonx AI, AutoCAD, Fusion 360

PROJECTS

Reinforcement Learning - Lunar Lander Optimization 08/2024 – 09/2024

- Designed and implemented a Reinforcement Learning-based game environment to land a lunar rover safely on the moon while maximizing cumulative reward.
- Used Stable-Baselines3 with Python and OpenAI Gym environments to train and evaluate RL agents.
- Tuned reward functions and hyperparameters to improve landing accuracy and convergence.
- Demonstrated practical understanding of policy learning, environment simulation, and reward optimization.

Credit Card Fraud Detection using Hidden Markov Model 01/2024 – 03/2024

- Developed a fraud detection system using Hidden Markov Models (HMM) to identify anomalous transaction sequences.
- Modeled normal and fraudulent transaction behaviors based on state transition probabilities.
- Improved fraud identification accuracy by analyzing sequential spending patterns rather than isolated transactions.

Persona Identification Bot 04/2023 – 06/2023

- Built a persona identification bot using IBM Watsonx AI as part of Generative AI and prompt engineering coursework.
- The bot analyzes interaction patterns and generates behavioral reports.
- Gained hands-on experience in prompt design, AI-driven text generation, and behavior analysis.
